

Westcot All Terrain General Use Cot 12 Person

WCATGUC12P

Far too often avoidable injuries occur during emergency operations. IMS intends to reduce this probability with the introduction of Westcot Specialized Systems. The Westcot All Terrain General Use Cot 12 Person (WCATGUC12P) is just one example of a sheltering solution that was developed as a standby resource for agencies with general populous sheltering responsibilities. This radical collaboration of storage and deployability is making its mark on the Emergency Response Community by raising Responder health awareness and servicing communities equally.
